Setting up Mac Mail

1. Open up Mail.app and press Command+Comma to invoke the Preferences window.
2. Switch to the "Accounts" pane and press the + button in the lower-left corner.
3. Under "Account Information", fill out the following information:
   - Account Type: POP
   - Email Address: *email-name@your-domain-name.com*
   - Incoming Mail Server: mail.*your-domain-name.com*
   - Username: *email-name@your-domain-name.com*
   - Password: *your email password*
   - Note that POP uses port 110
4. Select "Add Server..." from the **Outgoing Mail Server (SMTP)** pop-up menu. Here are the details for it:
   - Outgoing Mail Server: mail.*your-domain-name.com*
   - Server port: 25
   - Use Secure Sockets Layer (SSL): NO
   - Authentication: password
   - User Name: *email-name@your-domain-name.com*
   - Password: *your email password*
   - Dismiss the window by pressing "OK."
5. Back in the "Accounts" pane, switch to the "Advanced" tab and do not check the box marked "Use SSL" towards the bottom.
